

Clinical Trial Protocol: Novel Statin for Hyperlipidemia

1. Objective

To evaluate the safety and efficacy of LipidX in adult patients with elevated cholesterol.

2. Inclusion Criteria

- Age between 18 and 65 years.
- Documented hyperlipidemia or high cholesterol levels.
- Fasting LDL cholesterol ≥ 130 mg/dL.
- Patient has given informed written eConsent.

3. Exclusion Criteria

- History of severe liver disease or active liver dysfunction.
- Pregnant or lactating females.
- Known hypersensitivity to statins or related medications.
- Uncontrolled diabetes mellitus (HbA1c $> 9.0\%$).
- Systolic blood pressure > 160 mmHg.

4. Study Design

Double-blind, randomized, placebo-controlled study spanning 12 weeks.

Patients will undergo routine monitoring of biomarkers (HbA1c, Glucose) and vitals.
